

High Pressure Silencer

HPS 10

Features

- **1/10 Clogging reduction**
Double-layer sound absorbing material with different filtration reduces clogging.
- **Standard integrated relief valve**
The relief valve will activate when the silencer's internal pressure exceeds 1.8 MPa.
- **35 dB(A) noise reduction**
- **Improved maintenance**
By removing a bolt, the sound absorbing material can be replaced without removing the silencer.

Specification

Model	HPS 10
Fluid	Compressed Air
Operating pressure	0~40 bar
Port Size	R 1"
Ambient/Media Temperature	0 +80°C
Materials	Screw, washer : Steel zinc plated Element, supports : Aluminium Mesh : Iron zinc plated Shell : Steel nickel plate Porous element : PP

Overall Dimension
